work@DeepanshuSharma.com | [linkedin.com/in/Deepanshu-Sharma](https://www.linkedin.com/in/Deepanshu-Sharma) | Sunnyvale, CA

EDUCATION

University of Texas, Dallas MS in Computer Science & AI: **GPA: 3.72 / 4** Aug 19 - May 21
Artificial Intelligence, Machine Learning, Natural Language Processing, Computer Vision

VIT Vellore, India Bachelor of Technology in CS: **GPA: 8.46 / 10** Aug 14 - May 18
Database Design, Algorithm Design, Data structures, OS, Agent-Based Intelligent Systems

TECHNICAL SKILLS

Languages: C++, Python, Go, C#, Java, PHP, Hack, JavaScript, SQL, JSON, HTML, CSS
Libraries: Selenium, SciKit, Pandas, Tkinter, OpenCV, Bootstrap
Misc: Git, AJAX, Node.JS, Android, LAMP, WordPress, New Relic, Grafana

WORK EXPERIENCE

Software Developer 2, Oracle Jul 2024 – Present

- **Designed & developed core data plane flows** on a greenfield **high-performance distributed storage solution** based on Nvidia's AIStore; made for **AI/ML training** on GPU clusters, achieving up 1.1 Tbps read throughput on H100 nodes & NIC saturation on block storage nodes (200 Gbps).
- **Implemented S3 compatible APIs** for object retrieval and caching, bridging **NVMe-backed local cache** storage with remote object stores. Led development of object & bucket listing functionalities. **Doubled S3 spec compatibility test success** (140 to 300+).
- Initiated and **built critical product tooling, test automation, deployment installers**, and documentation & developer productivity tools — accelerating customer onboarding and release velocity.
- Contributed to the Oracle **File Storage Service (FSS) backend** infrastructure, including core functionalities like **auth (LDAP), deployment & observability**.

Software Developer, Meta Apr 2022 – Jan 2023

- Delivered performant and efficient videos with up to **15-20% higher playback** metrics (watch time etc.) using video scene info metadata for the video infra service for Facebook, Instagram etc.
- Rolled out **support** for **alternate audio** formats (5.1 channel etc.) for premium content including Premium music videos, Oculus content, Movie studio uploads etc.
- **Identified** and fixed **system abuse & bugs** where non video files were being uploaded by **content farms**. **Restored reliability to 99.99%** from 95%, **reduced on-call burden and wasted compute**.
- Delivered encoding configs for VP9 codec achieving higher efficiency video streaming on DASH.

Software Developer 2, Citrix Systems Jun 2021 – Dec 2021

- **Implemented** modules for Citrix Cloud backend services & tools, with CI/CD, including in-house tool – 'Inquisitor', for management & **monitoring** of cloud services: New Relic, Splunk, Azure Analytics etc.
- **Delivered** new **features, security fixes** in monitoring, **observability & APIs** in a fast-paced environment.
- **Discovered & fixed bugs**, e.g. unnoticed downtime – **ensuring 99.995% uptime SLA** of cloud systems.

Software Engineer, Mercedes Benz R&D, India Aug 2018 - Jun 2019

- **Promoted in 6 months** of joining to lead, recruit for a new project, worked directly with HQ (Germany).
- **Delivered 17x** increase in **performance** by a **complete rewrite** of software for **supply-chain monitoring** and campaign report generation. **Reduced 94% of daily compute time**.
- Researched in **Data Analytics**, 'Big Car Data' project using real-time car data for product development.

PROJECTS

Stock Trading Web App: PHP, MySQL, HTML5, Bootstrap Fall 2019

- Developed SOA based 3-tier responsive stock trading web app, including relevant APIs & web services to connect to 3rd party REST API. Features: Trading, Scheduling, Queue, Memcache, SSL

Factory Layout designer, Mercedes-Benz: Python, Tkinter, Scikit Spring 2019

- Achieved Millions in cost savings through 70% reduction in licensing needs with in-house solution.
- Built software to simulate production, map robots, accessories to floor. Saved 5 weeks of manual efforts.

Reverse Image Search App: Android Summer 2020

- Built an android app. Simplifies reverse image search to a 2-step process, using Google APIs, utilizing image share feature as well as text-based search using android text highlight popup menu.

Connected Vehicle: Driver Assistance and Safety Module: Python, OpenCV, LAMP stack Spring 2019

- Developed module to detect objects/people in front of a car, provide haptic feedback to driver if critical.
- It also detected crashes, sent alert to contacts with GPS location, incident footage & live stream link.

URL Shortener: LAMP stack, HTML5, Bootstrap Fall 2017

- Implemented web service for URL shortening with custom URLs, click tracking, user auth etc.

ACTIVITIES & ACHIEVEMENT

- **Mentor** at Udacity; **Teaching Assistant**, Software Engineering at University of Texas at Dallas
- **Certifications:** Scrum, Android, Git, Azure, Security, Intl. Cyber Olympiad (State rank 1, Asia #40)
